

Central Kamchatka Snow Sheep

Our 2018 Snow Sheep Hunt will take place in the central Kamchatka Region where our long-term local partners have always been in the search for the best possible hunting spots. Taking place in the mountain part of local Nature Park ESSO (aka "Bystrinski"). *Last time these areas were hunted was almost 15 years ago, the whole reason is very fresh and renewed.*

This is a fantastic combination of a new area and very experienced teams of guides, who worked the area in the past and know by heart every hill and path there!

For the 2018 Season the hunting potential of this local brew is EXCEPTIONAL!

The area is quiet large, so each new camp will be set up on a different location. There will be very comfortable tent camps. The location is quite remote, the best way of transportation there would be by helicopter. Whole hunting groups with guides and camp equipment will take off and return from Petropavlovsk when the hunt is completed.

The entire trip hosts some of the most beautiful scenery and will be fascinating for a group of 2—3 hunters: Great Trophies, wide range of travel through the nature of astonishing beauty, a fun ride on a large military ATV, camp in the mountains, log cabin near the river and dynamic salmon fishing.
